

## Datasheet for: 107060

**Pneumatically piloted stop valve, G 1/2, G 1/2 i., G 1/8**

Pneumatically piloted stop valve, G 1/2, G 1/2 i., G 1/8, Working pressure 0.3-10 bar, Temperature max. 60 °C . For stopping and positioning the cylinder movement: If a control signal is present at port 3 (see drawing), air can flow to and from the cylinder. If no control signal is present, the cylinder exhaust air is shut off by the unidirectional valve. The cylinder is stopped. Releasable unidirectional valves are screwed directly onto the cylinder instead of the normal pipe connections. Note: Pilot pressure is depending on operating pressure.
