

Datasheet for: 108390

Basic ejector »SBP-C« Bleeder valve, Silencer, Nozzle size 1.5 mm

Basic ejector »SBP-C«, Bleeder valve, Silencer, Nozzle size 1.5 mm, Compressed air / vacuum connection 6/8 mm, NO . Purely pneumatic vacuum generator that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C. Properties:

- Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%)

- Connection of compressed air and vacuum with push-in coupling

- Basic housing with connection facility for a vacuum switch

- Maximum suction capacity with minimum compressed air consumption

- Minimum size, low weight

- Various power ratings for optimised air consumption

Applications:

- For universal use in handling systems with very high dynamic movements

- Handling all kinds of air-tight components

- For use in separation systems where space is restricted

- Construction of ejector blocks for centralised or decentralised individual control of suction pads

Type number	SBPC 15

Productdata

Body	Plastic (impact-resistant)
------	----------------------------

Compressed air inlet	6 mm
Connection	Push-in coupling
Height	50.0 mm
Length	142.0 mm
Nozzle size	1.5 mm
Nozzle system	Brass
Page No.	WEB
Silencer	Plastic
Suction valve idle position	NO
Vacuum inlet	8 mm
Width	15.0 mm

Variants

Article number	Nozzle size	Compressed air inlet	Vacuum inlet	Price
