Input plate for valve terminal HDM, int. control air, Profibus DP

Input plate for valve terminal HDM, Standard, with interior control air, with integrated Profibus DP, Working pressure 3 - 7 bar . These compact valve terminals, with a maximum flow rate of 800 Nl/min, can be individually adapted to the specific conditions of each application thanks tot he wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors. Suitable for filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous. Monostable (non-latching) version of manual control also available on request. The operating pressure is based on the installed input plates.

Productdata

Connection	With integrated Profibus DP
Function	Standard, internal pilots
Manual control	latching
Max. operating pressure	7 bar
Max. temperature range	60 °C
Min. operating pressure	3 bar
Min. temperature range	-10 °C
Page No.	HK483
Piloting	Max. 16 (e.g. 16 spring return valves)
Power input	0.6 W per pilot
Protection IP	IP 65
