Compact ejector »CP« Air block control, Nozzle size 2.5 mm

Compact ejector »CP« Vacuum switch, Air block control, Nozzle size 2.5 mm, NC, Compressed air/vacuum connection G 1/4 IT, G 3/8 IT. Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C. Properties:

- Vacuum generator with integrated control valves and system monitoring functions

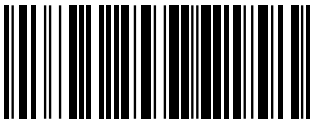

- Gripping and blowing off can be controlled without the need for external valves

- Optimised air consumption thanks to many models with differing suction capacities

- Minimum energy costs in continuous operation thanks to automatic air-saving

- Easy adjustment with foil keypad and LED display of the settings

Applications: Handling of air-tight or slightly porous workpieces in fully automated handling systems, e.g. in the robotics, automotive, packaging, electronics, electrical engineering and metalworking industries.
