Block valve pressure gauge, taps - rotating bushing, G 1/2

Block valve pressure gauge, Taps - rotating bushing, bright brass, G 1/2, PN 25 bar, AF 27, max. 50 °C, Test flange 60x25x10 . It is useful to install a stopcock as a shut-off element between the pressure gauge and the pipe. When the lever is set to the »blow out« position, the medium is discharged into the atmosphere. Stopcocks with a test port allow pressure gauges to be simultaneously connected to the pipe.
