Syphon in circular shape, connection tapss, G 1/2, steel

Syphon in circular shape with connection taps to the pressure relief side, according to DIN 16282, G 1/2, steel 1.0039, 1.0345 . Suitable as a cooling section for liquids, gases or steam during pressure measurements. The use of a syphon permits the medium to cool down to a temperature that is compatible with the pressure gauge and protects the gauge against pulsating media. The condensate that forms in the syphon prevents the hot medium from entering the pressure gauge. We recommend filling the pipe with cooling sealing liquid prior to using the pipe.
