### Declaration of SECD magnets as free of own potential ignition sources

Dear Ladies and Gentlemen,

herewith we declare, that we have found the SECD-Magnets to be free of own potential ignition sources within their intended use. So they are not within the definition of an "Equipment" in the sense of article 1, paragraph 3.a) of the directive 94/9/EC.

Because of this it is not possible and not necessary to issue an EC-Type Examination Certificate for the SECD-Magnets.

The analysis of the ignition sources and the test results are given in our test report IB-12-2-102 of 19<sup>th</sup> December 2012. In this test report are also written the special conditions of the safe use.

With kind regards

**IBExU**  
Institut für Sicherheitstechnik
