

## Magnetic bars

BAR-N-23-200-25-1M6-NW-B

SKU: SBAMA100010-200

## Product Features

|                                                      |                                                                                                                |
|------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Description                                          | Neoflux® magnetic bar Ø23                                                                                      |
| SKU                                                  | SBAMA100010-200                                                                                                |
| Product key                                          | BAR-N-23-200-25-1M6-NW-B                                                                                       |
| Min. Fe-particle size that can be caught             | 30 µm                                                                                                          |
| Cleaning/Fe-particles disposal                       | Manually                                                                                                       |
| Interface/connection dim's                           | Threaded hole M6 (1x)                                                                                          |
| Material tube                                        | AISI316L (SS 1.4404)                                                                                           |
| Surface treatment/finishing                          | S9: Manually polished (interior/exterior), Ra 0,4 µm (excluding welds and end faces outside the product chute) |
| Welds                                                | WM: all welds: completely welded                                                                               |
| Max. operating / product temperature                 | 60 °C                                                                                                          |
| Dust/water protection class                          | IP67                                                                                                           |
| Pitch magnets                                        | 25 mm                                                                                                          |
| Magnet quality                                       | GSN-42 Neodymium, Br 13,300 gauss (at 20 °C), Tmax. 80 °C                                                      |
| Field strength (flux density) on magnetic bar (±10%) | 10700 gauss                                                                                                    |
| Diameter                                             | 23 mm                                                                                                          |
| Length                                               | 200 mm                                                                                                         |
| Weight                                               | 0.59 kg                                                                                                        |
