Gear Racks Made from Bright Steel C45KG, Teeth Milled and Induction Hardened

Milled, quality 8.

Tooth area induction hardened, 54 + 4 HRC.

The hardening sets the tooth quality to 10-11.

Pressure angle 20°.

The gear racks are **cut for continuous linking**. The teeth of the gear racks are not cut to join edge-to-edge, which leads to minor gaps when mounting. These gaps do, however, not cause any problems for the gears rolling across.

The teeth on the gear racks are manufactured using an overhead milling cutter. This leads to negative tolerances. Dimensions h_a and h₀ at module 2 -0.2 mm, module 3-4 -0.3 mm, module 5-6 -0.4 mm
