

Torsionally-Stiff Couplings HZD with Through Holes, Stainless

Material: Hubs made from stainless steel 1.4305.
Torque disc made from black polyacetal.

These 3-part zero backlash couplings provide electrical insulation. They consist of two hubs and a torque disc. They are versatile and of robust design. Large radial compensation, easy mounting even in confined spaces.

Applications: Ideal for stepper motors due to the damping properties of plastic torque discs. Positioning drives, position encoders such as incremental or absolute encoders, pumps etc.
Temperature range: -20°C to +60°C.

Set-screw style
